If blood is too thick, just as when I saw him in Weatherford, just and called lawyer, Henry Clark and Chad Guckert. I told them

July 30, 2015

Jerry Curry
2912 Field St
Haltom City TX 76117

his leg had big red splatters and was very swollen and painful. Chad said he was getting his meds, Coumadin and blood pressure medicine. If true, his leg would not have

been in the condition as when I saw him.

Not a true statement I would say.

Dear Jerry: when I called Henry Clark, he had seen his leg also.

Our records indicate that you are due for an appointment in the Coumadin Clinic for an INR check.

If blood too

thin, and he gets cut or bruised, he will bleed to death internally or externally as the case might be.

It is important that the appointment is rescheduled immediately. Please call as soon as possible at (817) 702-1215 between the hours of 8:00 AM and 4:30 PM, Monday through Friday.

Coumadin/Warfarin/Anticoagulant therapy must be monitored closely. Our main concern is your safety. We cannot continue to provide you with a medicine that could be harmful. **Please contact us immediately.**

If too thick as above, blood cannot get by the blood clot and leg could turn black and have to be removed.

Sincerely,

Cefaretti, Michelle, PHARMD

I always take him

to JPS for this check of his blood. I am not responsible now.
